

CREATE THE FUTURE

The Center for Biomedical Engineering (CBME) is established in 2014 at Indian Institute of Technology Ropar with a focus to teach and research the forefronts of healthcare domain. The academic activities at CBME are strongly interdisciplinary and collaborative by engaging the engineering and modern biology experts working on various unmet challenges of biomedical aspects.

For details, please visit:

<https://sites.google.com/a/iitrpr.ac.in/cbme/Home>

CBME welcomes application from outstanding candidates for faculty positions in the areas of **Biomedical Imaging, Medical Devices, Biomaterials, hard and soft tissue replacements (implants/prosthetic) and Computational biology/Systems biology**. Potential candidates will carry out cutting-edge research in their respective areas in line with CBME interests along with teaching and training.

Interested candidates can apply through our online application portal:
